Potkul and Waksman also stated that the Commission should address in an expedited manner the issue of Pacific Bell's pricing for DS3 loops.

Summary: LATE FILED. On June 27, 2001, Richard Counihan, Vice President for the Western Region, Green Mountain Energy Company (Green Mountain), met with Cmmr. Bilas in San Francisco. Also present was Ann Watson, advisor to Cmmr. Bilas. Counihan urged the Commission not to suspend direct access and explained that suspending direct access would remove customers' option to buy power from a "green" energy supplier. Counihan pointed out that all Green Mountain customers have received service under the so-called "dual billing" option. Counihan explained that, as a result, any Power Exchange credit that is owed by the utilities is owed directly to the customers, not to Green Mountain. Counihan stated that any resolution of the direct access credit issue should require utilities to track amounts owed to dual-billed customers and to apply the credit to offset the customers' future energy purchases.

- 07/03/01 A00-06-032 Southern California Gas Company, for authority to implement a rate for peaking service as ordered by D.00-04-060.

Summary: On June 29, 2001, Michael Day of Goodin, MacBride, Squeri, Ritchie & Day, counsel for Questar Southern Trails Pipeline Company and Kern River Gas Transmission Company, met with Julie Halligan, advisor to Cmmr. Bilas, in San Francisco. Day indicated that a reasonable peaking rate should include elements, which compare to the interruptible service and capacity brokering rights available to customers of interstate pipelines. Day explained that absent firm capacity rights on the Southern California Gas Company intrastate transmission system, a program for exempting a peaking rate customer from paying a demand charge in any month in which the

customer takes no service is the closest proxy to capacity brokering. Day also explained that application of the peaking rate to new customers was unwarranted.

Summary: LATE FILED. On June 27, 2001, Tom Beach of Crossborder Energy, consultant to Watson Cogeneration Company (Watson) and Watson's expert witness, had a telephone conversation with Belinda Gatti, advisor to Cmmr. Brown. Beach clarified how the exemplary customer's 35% load factor on the Southern California Gas Company (SoCalGas) system was calculated in Exhibit 16. Beach reiterated his belief that the example that SoCalGas presented in Exhibit 16 was a realistic example of an electric generator that might choose to take peaking service from SoCalGas. Beach also stated Watson's position that if the reservation charge for peaking service is calculated using coincident peak day demand, then it should be applied to each customer's coincident demand on the system peak day, not to the customer's highest demand on any day in the year.
